

Interoperability and Health Records

Policy and practice, From EU to Portugal

17th Oct 2019 | Hong Kong

Henrique Martins | President of the Board
Shared Services of Ministry of Health - PT

SPMS_{EPE}

Serviços Partilhados do Ministério da Saúde

Agenda

1. EU policy on eHealth Interoperability
2. Interoperability in Portugal - exemplars
3. Interoperability Enablers

LOST – European Interoperability framework (+Security)

L

Multi-lateral Agreements and Bilateral agréments (e.g. eHDSI Agreement)
Uptake of legal directives such GDPR, NIS eIDAS
eHN Implementation decision

O

New Business Cases and models for Cross-Border Healthcare
Cross Border cooperation among MS/C
Guidelines for eHealth Nacional Competences Centers
Definition of Policy Cooperation

S

Promote better semantic interoperability in the EU
Alignment of eHealth standards
Convergence between ways MS/C document clinical processes
Define new strategies for mapping and translate data, such (NLP)...

T

Allow sufficient flexibility to provide structured and coded data from the national and Cross-border infrastructure while, at the same time, enabling the explore of new services.
Evolve national infrastructure and systems
Improve interoperability at Local and National level, that use common standards (HL7 or IHE)

S

Promote CyberSecurity at national and local level
EU guidelines for CyberSecurity
EU Common approach on cybersecurity threads; Protection measures and capacity building
Shared and Integrated prevention, education and awareness

EU eHealth Sustainability and Planning

Two years plan of eHealth
Network meetings and
sustainability

European Context

Digital Single Market

**eGovernment Plan
2016-2020**

**Multiannual Work Programme
2018-2021**

EC Communication 25.4.2018 on enabling the digital transformation of health and care in the DSM; empowering citizens and building a healthier society

Commission Recommendation of 6.2.2019 on a European Electronic Health Record Exchange format

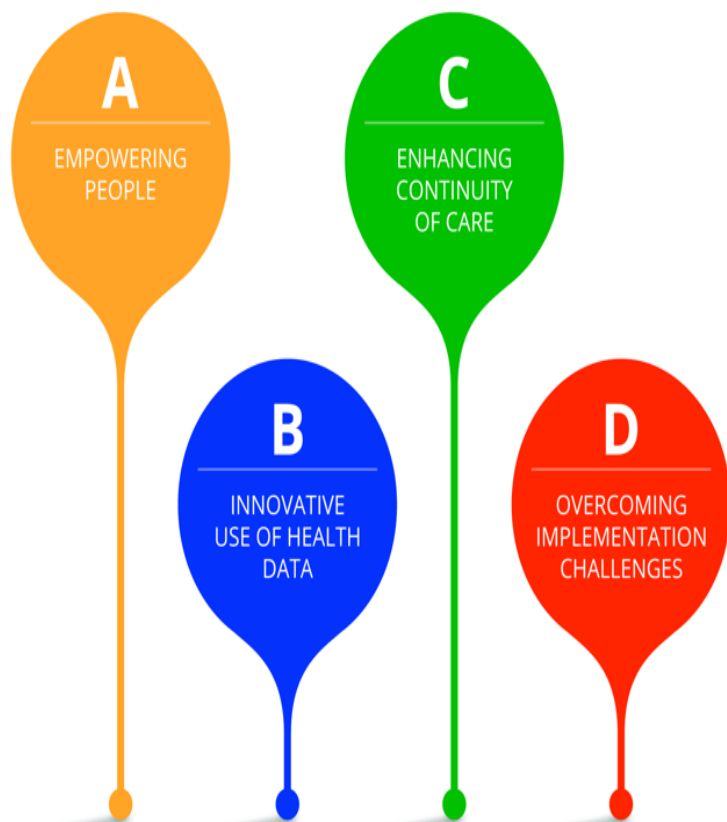

Declaration: “Towards access to at least 1 milion sequenced genomes in the european union by 2022”

MULTIANNUAL WORK PROGRAMME (MWP) 2018-2021

MAIN AREAS AND PRIORITIES IDENTIFIED BY THE MEMBER STATES

A. EMPOWERING PEOPLE

- eHealth/ mHealth can be a means for better integrated and personalised health care
- ICT can support patient empowerment through the use of mHealth apps

B. INNOVATIVE USE OF HEALTH DATA

- Large volumes of health data could unlock great potential in the healthcare
- Secondary use of data and big data can provide value for research

C. ENHANCING CONTINUITY OF CARE

- Data supports cross-border healthcare and with that supports the continuity of care and the right of Europeans citizens to choose their own healthcare provider.

D. OVERCOMING IMPLEMENTATION CHALLENGES

- Develop, implement and deploy consistent eHealth enablers based on agreed common frameworks for interoperability, security, competencies and evaluation.

EC Communication

Communication from the Commission to the European Parliament, The Council, the European Economic and Social Committee of the regions on enabling the digital transformation of health and care in the Digital Single Market; empowering citizens and building a healthier society. The Communication contains a package of legislative & non-legislative proposals with the aim of supporting Member States action on eHealth to:

Brussels,
25.4.2018

- 1 Access and Sharing of Electronic Health Records for citizens
- 2 Connected health data to advance research, prevention and personalised health and care
- 3 Digital tools to foster citizen empowerment and person-centred care

eHAction

Joint Action supporting
the eHealth Network

That means...

eHealth

The right eHealth means access to
better health coverage

MORE

www.eHAction.eu

Key Driver - eHN 2019-2020

Joint Action Supporting eHealth Network – eHAction is the expression of the Network's ambition to lead the way on key developments and to support Member States in core topics:

- Empowering People
- Innovative use of Health Data
- Enhancing continuity of care
- Overcoming implementation Challenges
- Integration on National policies and sustainability on eHealth
- The Electronic Health Record Exchange Format (EHRxF) ★★
- A Common Semantic Strategy (CSS) ★

Common Semantic Strategy for Health in the European Union

- 5 Years ambition

Necessity of a EU Common Semantic Strategy

- Work developed by the CSS working group
- Present a draft proposal, regarding the healthcare domains, to achieve semantic interoperability at the EU level in the coming years.
- Based on the EC Recommendation of the EHRxF - 5 healthcare domains
 - Patient Summary;
 - ePrescription;
 - Laboratory Requests and Results;
 - Medical Imaging and Reports;
 - Hospital Discharge reports

CSS principles to interoperability

- A Common Semantic Strategy
- Should be considered **all** semantic requirements that are relevant for healthcare (eHealth and Health) in the EU to define and drive the strategy
- Common EU semantic view
- The working group discussed and analysed the granularity of the semantic scenario among the MS/C and elaborated a shared view strategy to semantic interoperability in EU for the next years

EU used coding standards

	ICD-10	ICD-O	ICD -X	ATC	SNOMED CT	LOINC	ICF	NPU	Pathology	ICPC-2
Austria										
Croatia										
Cyprus			ICD-9-CM							
Czech Rep.			ICD-TNM							
Denmark										
Estonia										
Finland						FinLOINC				ICPC
Germany			ICD-10-GM			UD				
Hungary						UD				
Ireland			ICD-10-AM 9th ed							
Lithuania			ICD-10-AM							
Netherlands			ICD-10-NL						Linked to SNOMED CT	ICPC-1
Norway										
Poland			ICD-9-PL							
Portugal	*		ICD-9-CM							
Slovenia										
Spain			ICD-X-CM							
Sweden										

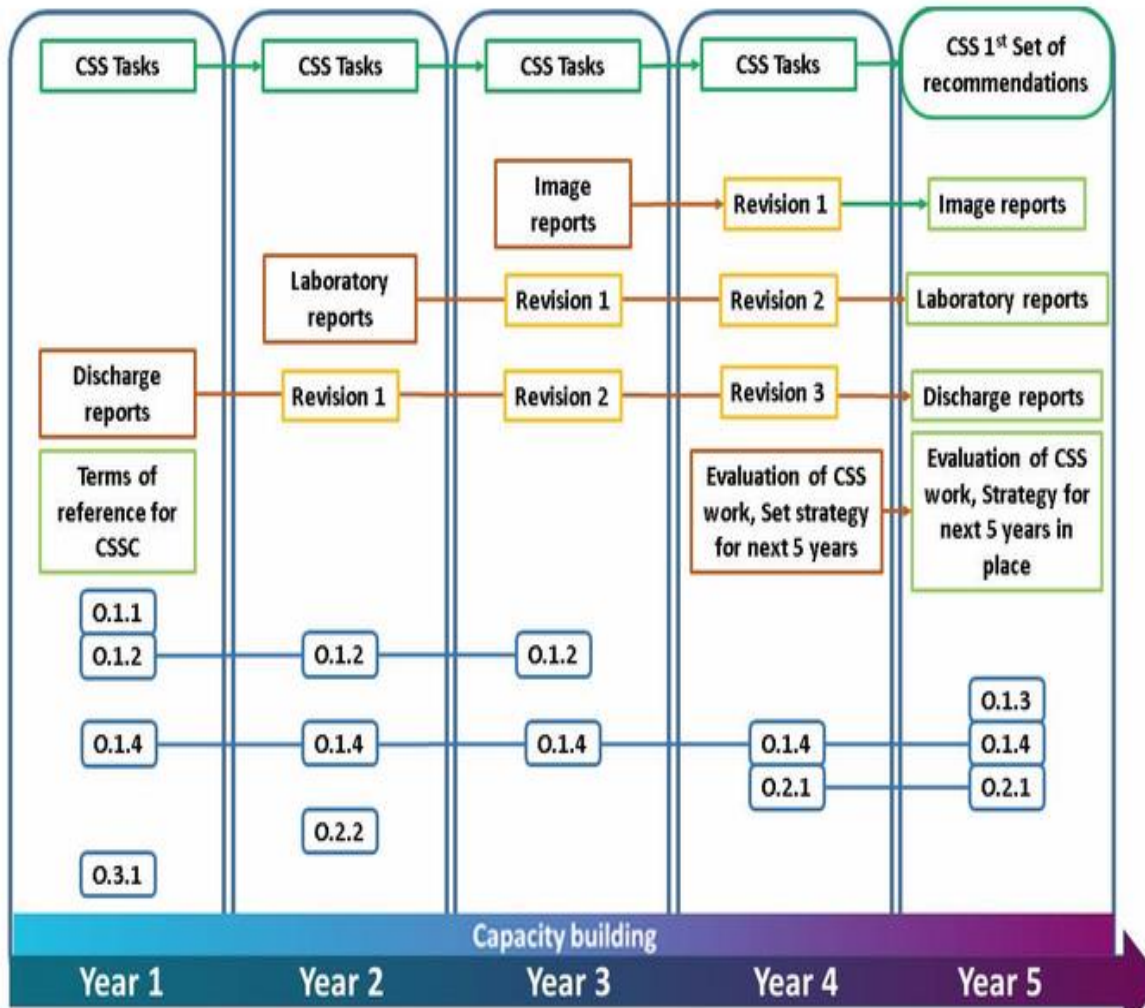

CSS workstream

Goal	Description	Objective	Activity
G1	Structuring a common approach on health semantics in the EU	O1.1 Realise a Common Semantic Strategy for Health in the EU	A1.1.1 Propose a 5-year CSS to the eHN
			A1.1.2 Analyse data availability, standards in use and information exchange flows in MS/C.
			A1.1.3 Structure a learning programme to assist capacity building in MS/C
		O1.2 Develop common semantic artefacts for PS, eP, lab requests and results, medical imaging and reports, hospital discharge reports	A1.2.1 Publish common semantic artefacts for the chosen semantic domains
			A1.2.2 Setup common semantic resources: "Common European Healthcare Semantic Server"
		O1.3 Provide guidelines for the standards adoption	A1.3.1 Study the data availability and standards in use in the different MS/C
			A1.3.2 Define a set of common standards for the cross-border exchange of health information
G2	Providing guidance for EU level decisions on health semantics	O2.1 Establish mechanism/ methodology to audit conformance issues at an EU level.	A1.4.1 Liaison with key partners such as SDOs, technology developers etc. relevant to the CSS
			A1.4.2 Establish a routine exchange format with key bodies of the EU relevant to the CSS
		O2.2 Establish a mechanism to participate in the approval of EU semantic artefacts and projects	A2.1.1 Propose a mechanism to build capacity in MS/C to foster the use of EU semantic standards for cross-border healthcare
G3	Ensuring stability and continuity on health semantics in the EU	O3.1 Establish a CSS Committee	A2.2.1 Propose a mechanism to participate in the approval of EU semantic artefacts and projects to the eHN
			A3.1.1 Get a mandate from the eHN
			A3.1.2 Get representatives from each MS/C to join the Committee

CSS workstream

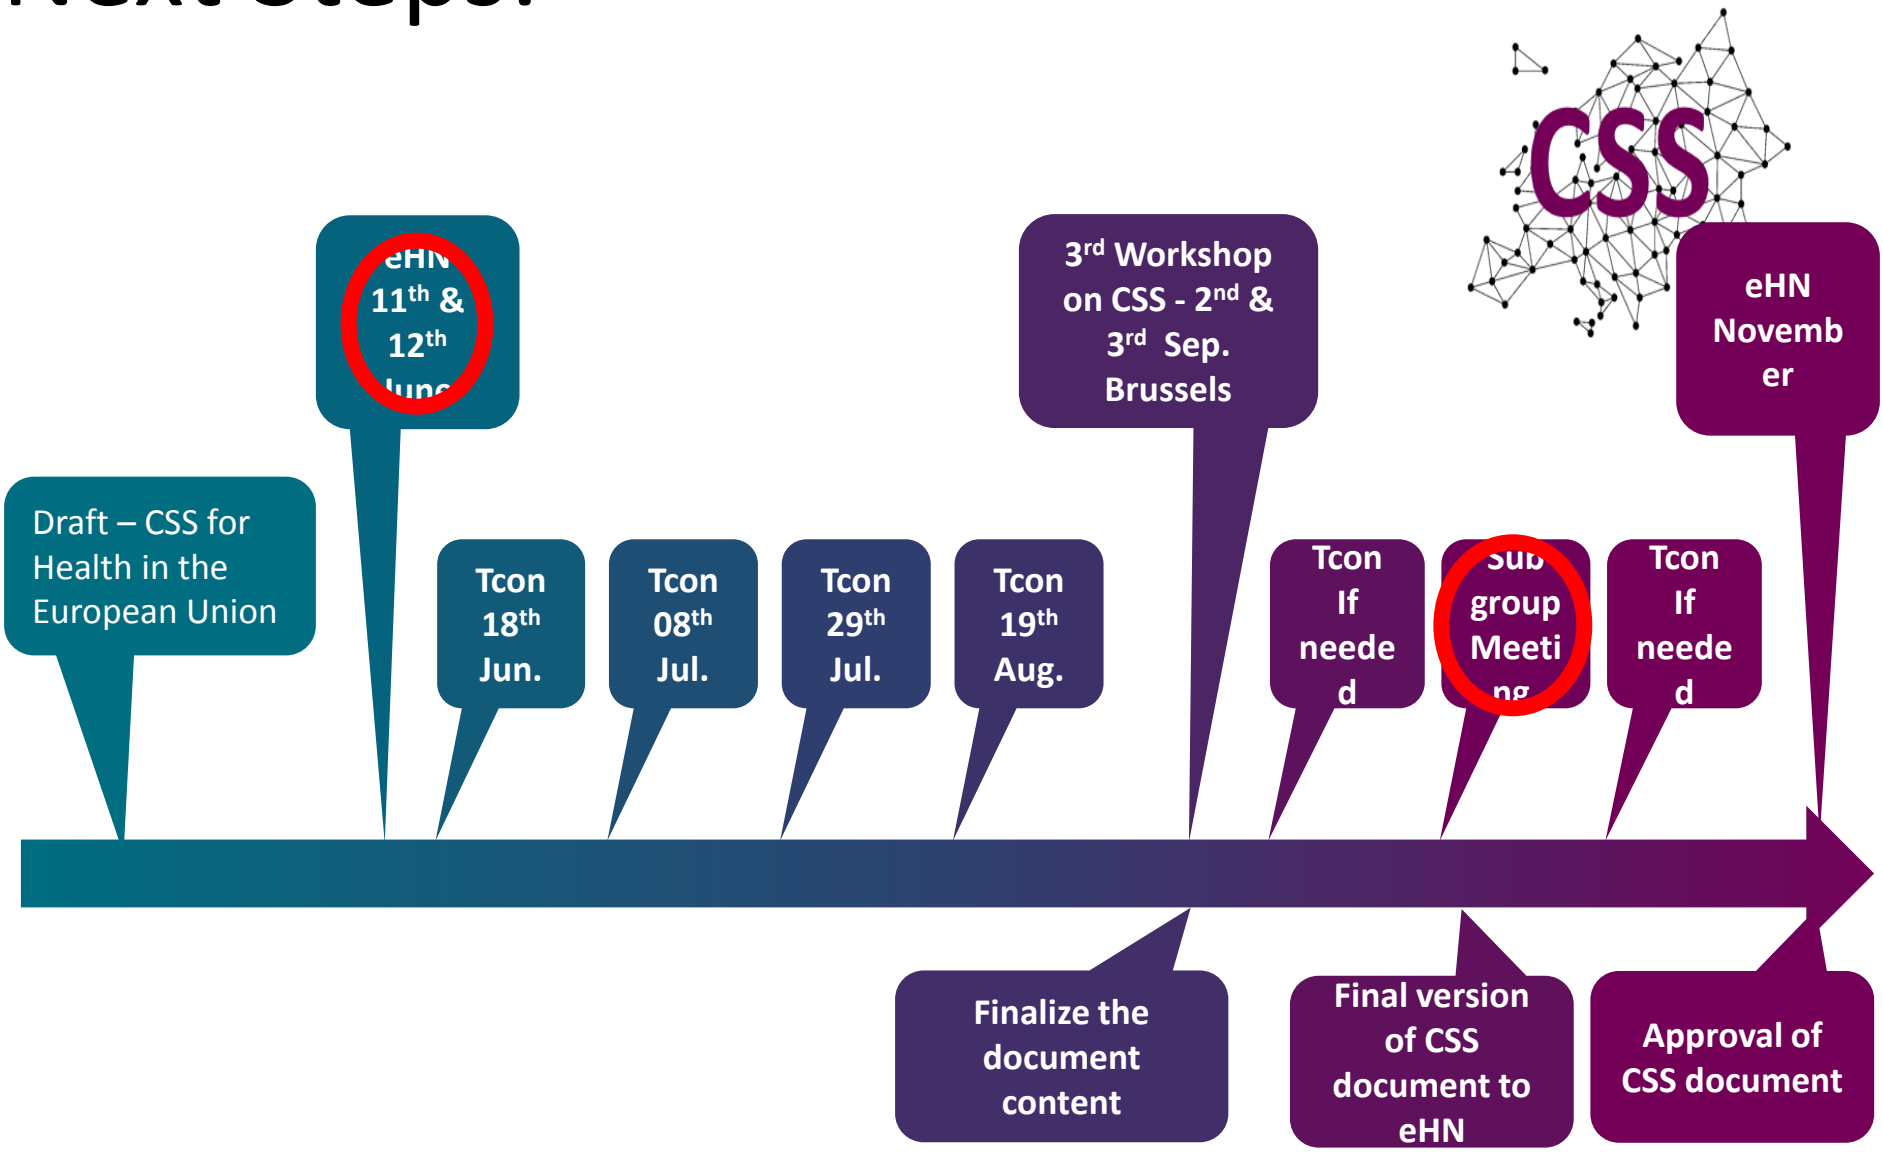

CSS work so far...

- Representatives from 24 MS/C
- 3 workshops done
 - 1st - Lisbon 1-2 Oct. 2018
 - 2nd - Lisbon 18-19 Mar. 2019
 - 3rd - Brussels 2-3 Sep. 2019
- Teleconferences
 - 11 Tcons to elaborate the draft CSS
 - Tcons are continuing on a regular basis and also interaction with eHMSEG STF leader

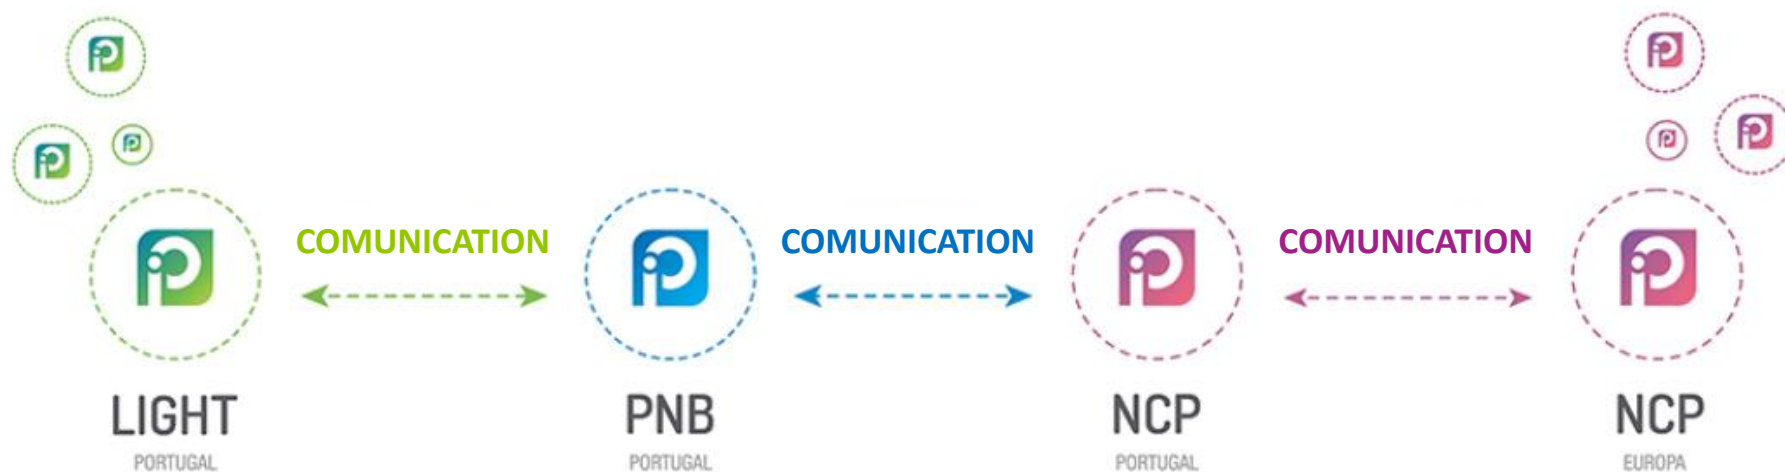

Next Steps:

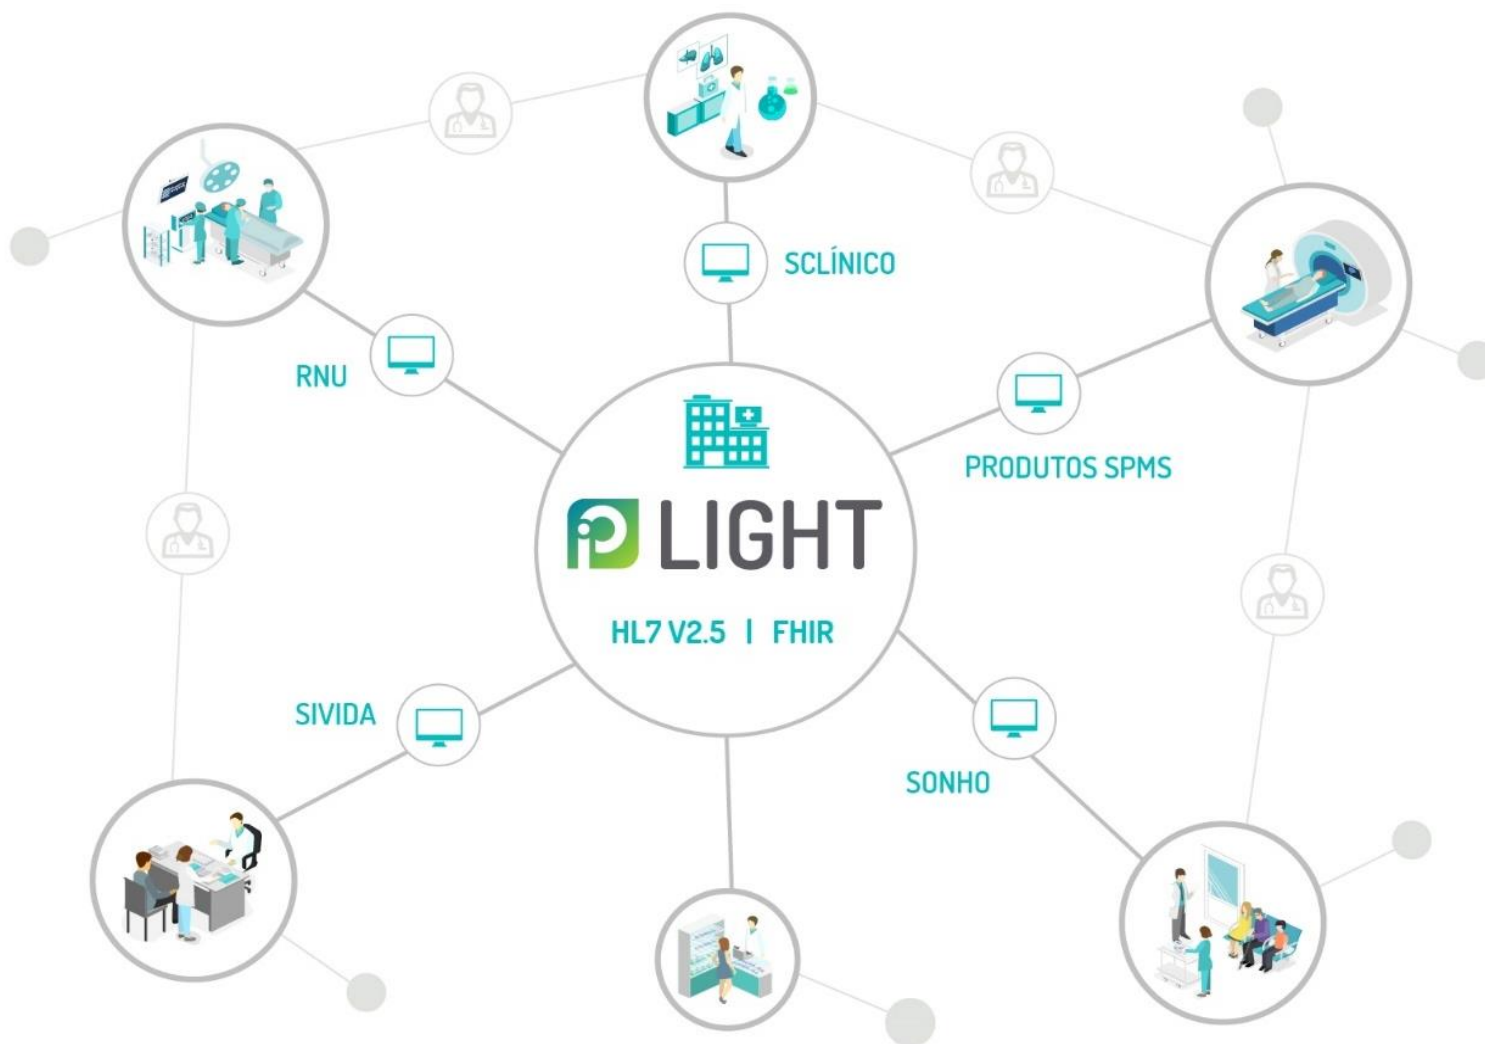

Technical Interoperability

Local Interoperability Gateway for Healthcare (LIGHT)

Local Interoperability Gateway for Healthcare (LIGHT)

- Local Platform;
- Middleware;
- Standardized;
- Communication is made by HL7 v2.5 messages;
- The communication with Portuguese National Broker (PNB) is made through HL7 FHIR standard;
- Open source platform that addresses 4 layers: Legal, Organisational, Semantic and Technical;
- **Objectives:**
 - To align integration workflows by international standard;
 - To avoid replication of information and reduce errors in records;
 - Focus on the citizen;

Portuguese National Broker (PNB)

- Started to be developed in 2015;
- Used to establish interministerial circuit, via interoperability platform of the Public Administration;
- Open Source;
- Contribute to the promotion of Health Data Interoperability by adopting the best international practices in technical Interoperability standards;
- Improve the maintenance and evolution capacity of national and international integration workflows;
- Used interfaces:

- PEM – Paperless Prescription

- PNB_Vaccines

- PNB_ACC - Driving license certificate
