Dr. Alvin Marcelo
Director

Disclosures

- Director and Treasurer, AeHIN
- Chief Medical Information Officer, St. Luke's Medical Center
- Director, University of the Philippines Manila Standards and Interoperability Lab

We are AeHIN

The Asia eHealth Information Network (AeHIN) is a collaboration of digital health advocates from South and South-East Asia committed to promoting interoperability for better health.

Starting with 7 members in 2011, AeHIN now has over 1800 members with presence in 72 countries. AeHIN is incorporated in Hong Kong and maintains secretariats in Manila, Bangkok, Jakarta, and Kuala Lumpur.

AeHIN has helped build capacity in the region by laying down national digital health foundations: governance, architecture, program management, standards and interoperability or GAPS.

AeHIN encourages countries to Mind the GAPS in their digital health planning and Fill the GAPS in their implementation.

AeHIN activities range from conferences, general meetings, certification training, webinars, and online repositories, all contributing to a stronger networked approach to digital health development.

Vision

Strengthened interoperable digital health ecosystem for better health in Asia

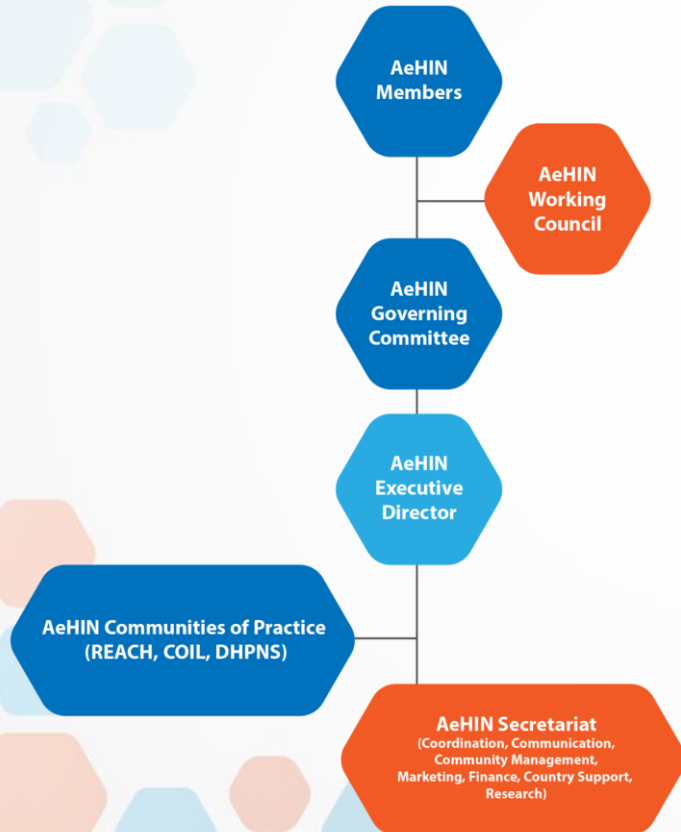

Mission

Promote learning, resource sharing and knowledge exchange to strengthen digital health through the networking approach

4 Strategic Areas

- **Promote leadership and governance for digital health**
- **Facilitate capacity-building for digital health**
- **Create opportunities for knowledge exchange and resource sharing**
- **Enable interoperability through standards**

AeHIN Governance Structure

AeHIN Working Council

- Bhutan
- Cambodia
- Hong Kong
- India
- Indonesia
- Japan
- Lao PDR
- Malaysia
- Maldives
- Mongolia
- Myanmar
- Nepal
- Philippines
- Sri Lanka
- Taiwan
- Thailand
- Vietnam

Health Policy and
Management, Universitas
Gadjah Mada

Head of Data and
Technology Division,
Indonesian Hospital
Association (PERSI)

AeHIN Call to Action

ON GOVERNANCE

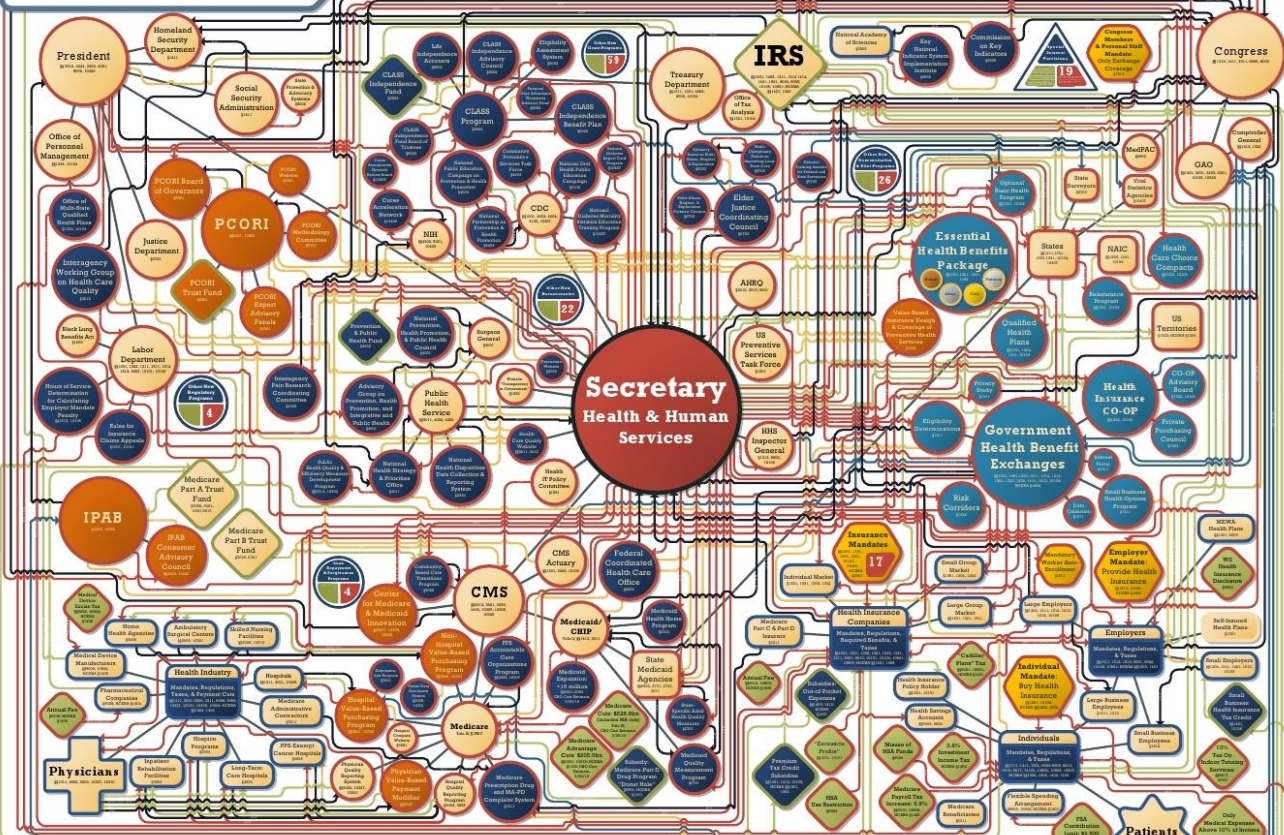

We call upon stakeholders, public and private, to support the **leadership of the Ministry of Health** in developing national digital health strategies that respond to the needs of Universal Health Coverage (UHC), such as registration, prevention, treatment, rehabilitation. As the health sector leader, the Ministry of Health shall ensure coordination, collaboration of digital health projects of partners and stakeholders.

GOVERNANCE

Multi-sectoral
coordination
mechanism

Your New Health Care System

Health Systems are Complex

Many stakeholders

Many transactions between stakeholders

Different rules and contractual arrangements

New Government	Expanded Government	Private	New Relationships
<ul style="list-style-type: none"> ○ Rationing Potential ○ Mandates ○ Government with Expanded Authority/Responsibility ○ Tax and Monetary Fees/Penalties/Cuts ○ Government Financial Entity with New Inflows/Outflows ○ Trust Fund (Rationing Potential) ○ Other New Trust Funds/Monetary Benefits ○ Represents Bundles of Additional Entities 	<ul style="list-style-type: none"> ○ Government with Expanded Authority/Responsibility ○ Government Financial Entity with New Inflows/Outflows ○ State/Territory with Expanded Authority/Responsibility 	<ul style="list-style-type: none"> ○ Private Entity with New Mandates/Regulations/Responsibilities ○ Unchanged Private Entity ○ Special Interest Provisions 	<ul style="list-style-type: none"> → Regulations/Requirements/Mandates → Reporting Requirements → Oversight → Money Flows → Consultation/Advisory/Info Sharing → Structural Connections (Already Existing)

Patient Protection and Affordable Care Act, P.L. 111-148;
Health Care and Education Reconciliation Act, P.L. 111-352
 Prop. Act. by Joint Committee on Taxation, P. 113-100
Congressman Evan Bayh, Senator Max Baucus
Senator Sam Brownback, Ranking Member

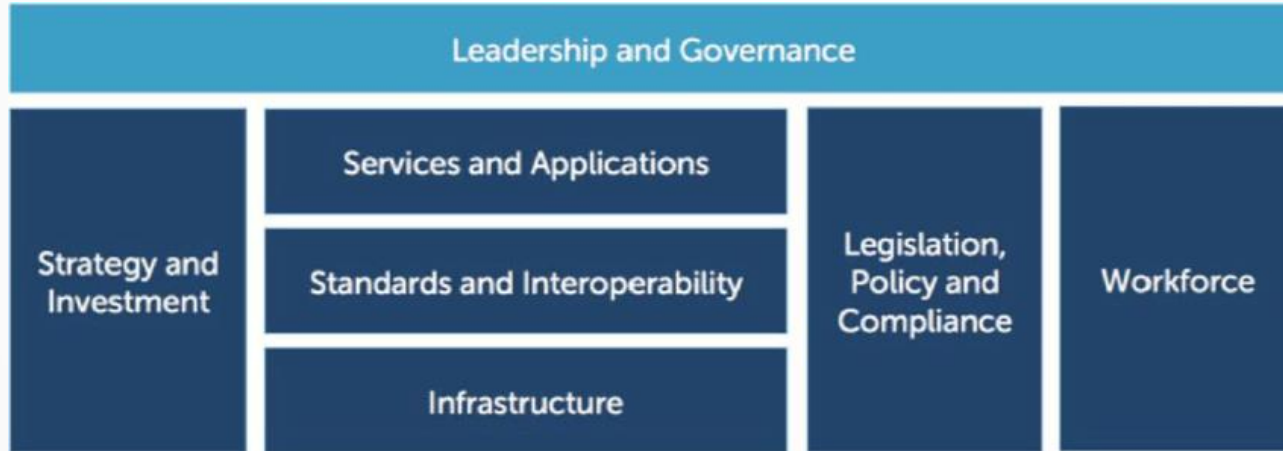

How do we then navigate the complex system?

What do we mean by “govern”?

National eHealth Strategy Toolkit Overview

WHO-ITU 7 Components of National eHealth Strategy (2012)

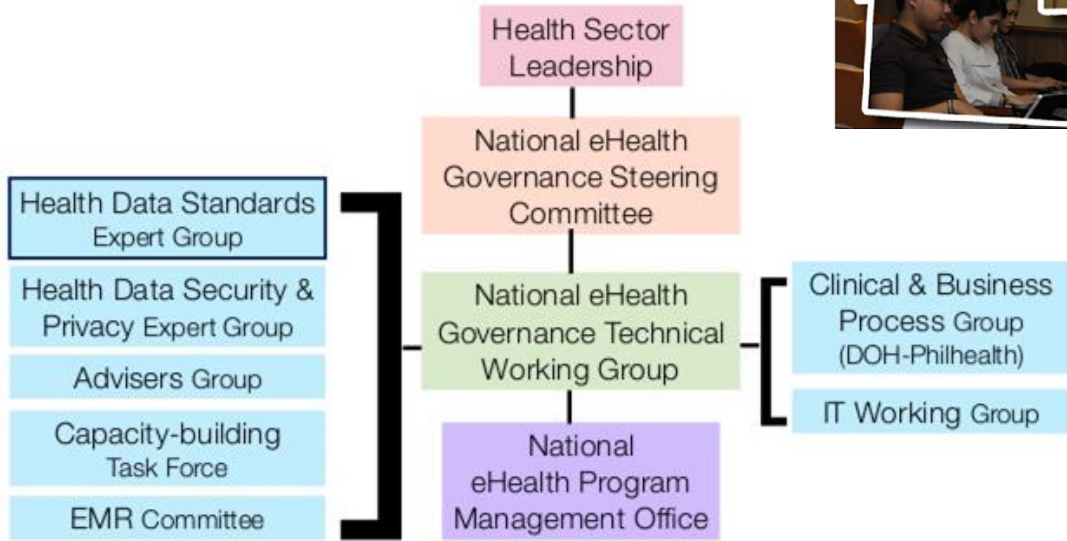

Source: [WHO-ITU National eHealth Strategy Toolkit](#)

WHO-ITU Component: Leadership and Governance

Source: [WHO-ITU National eHealth Strategy Toolkit](#)

Governance: Philippines

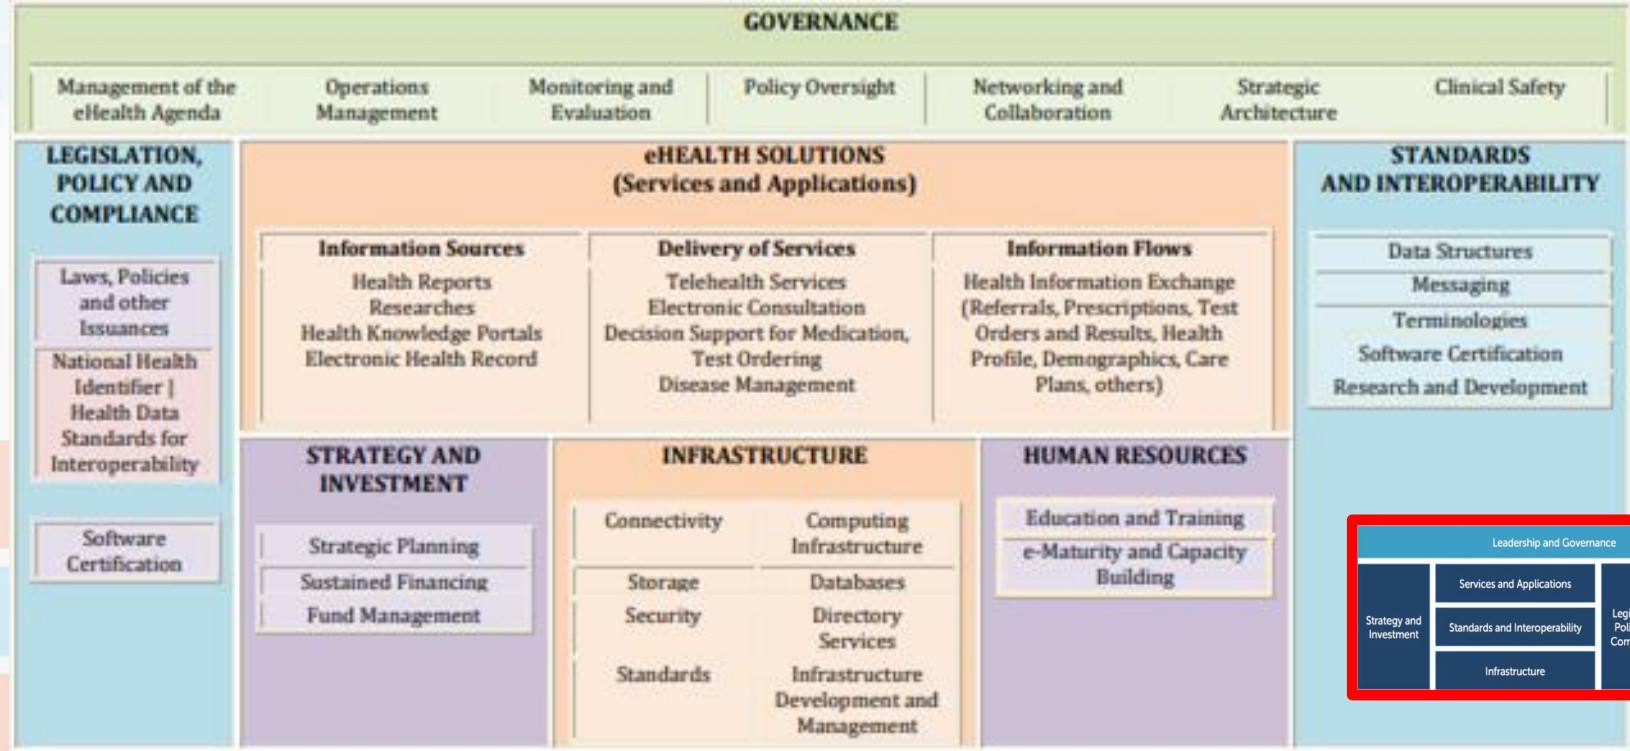

eHealth Leadership and Governance

Philippines

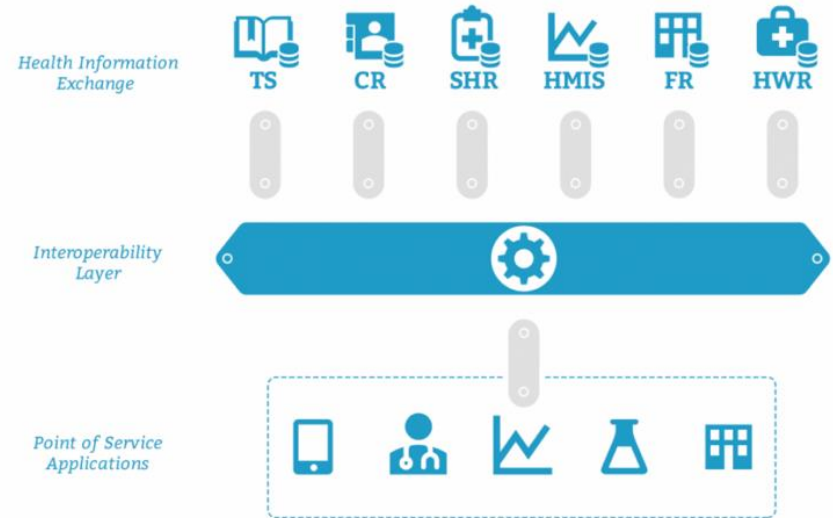

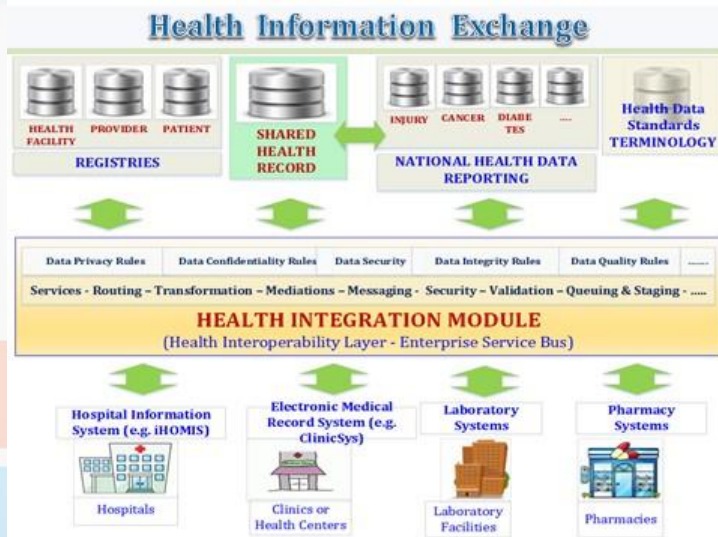

Source: <https://www.slideshare.net/isiptan/government-or-private-sector-the-future-of-asias-healthcare-infrastructure>

Philippine National eHealth Framework

Architecture: Philippines

Source: ehealth.doh.gov.ph

Source: wiki.ohie.org

For AeHIN, Digital Health Governance means:

- 1) **Creating a multi-sector coordination structure led by the Health Sector**
- 2) **Setting priorities for UHC**
- 3) **Sharing a blueprint that contains priority digital health projects (some may be with ICT, insurance, CRVS, etc)**
- 4) **Confirming ownership of key projects in the blueprint (national ID, etc)**
- 5) **Ensuring adequate investments on the key projects**
- 6) **Monitoring the projects continuously towards success**

Governance means a) making sure the needs of your sector are met, and b) meeting regularly for coordination (convened by MOH)

Enterprise Architecture (EA)

(EA) is a blueprint—a coherent framework of principles, methods and models—used in the design and realisation of the enterprise’s organisational structure, business process, information systems and digital health infrastructure. EA is also commonly described as a master plan providing a holistic view of the entire enterprise as a system of systems

(Source: BMJ Health & Care Informatics, July 2020)

Why is EA important at the national level?

- Aligns business and technology strategy into a single initiative to achieve a common goal.
- Delivering citizen centric services cost effectively
- Strengthening cross-agency collaborations for information sharing data mining and analysis, application and infrastructure consolidation, and shared services.

What are the major challenges with EA in many countries?

- Lack of EA skills and competency
- Lack of EA knowledge and leadership among senior management
- A grey area between ICT and Business – need a driver to push EA
- Need clear understanding that **ICT project is all about business transformation**

ON ARCHITECTURE

Because digital health systems are complex, a **shared blueprint and roadmap** is needed to guide stakeholders.

We recommend:

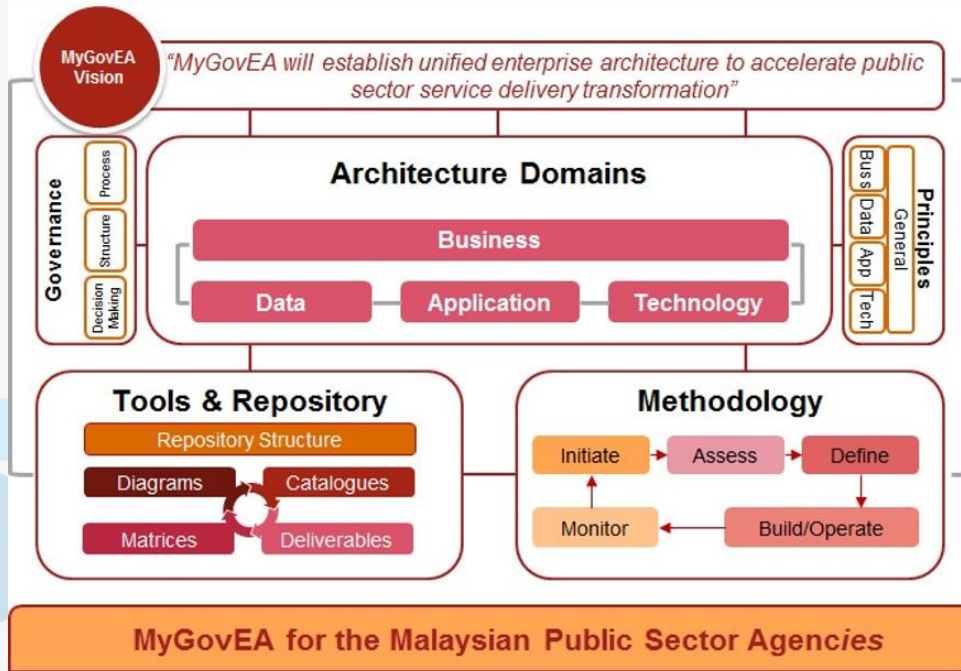

1. designating an **enterprise architect in the MOH** to oversee this blueprint
2. engaging **experienced professional and certified enterprise architects** to advise government and development partners on the blueprint formulation
3. nominate #1 and #2 into a **Regional Enterprise Architecture Council for Health (REACH)** for best-practice knowledge sharing

ARCHITECTURE

Shared enterprise
blueprint

EA of the Malaysia's Public Sector (MyGovEA)

- The master plan of MyGovEA has been developed in 2015.
- The public sector EA shall be implemented by adopting MyGovEA.
- Adopt EA in all ICT project requirement and approval phase since 2019; must have **EA methodology and BDAT** (business, data, technology and application architecture)
- EA methodology also is used in development of Digitilisation Strategic Plan 2021-2025 of every Ministries.
- Resulted in better convergence and alignment of business and ICT strategies

Sri Lanka Digital Health Blueprint

Version 1.0b

Enabling a healthier nation that contributes to its economic, social, mental, and spiritual development.

2022-07-29

rev. 3707

ON PEOPLE AND PROGRAM MANAGEMENT

- ❖ National digital transformation in health is complex
- ❖ Lack of capacity in MoH to manage programs (multiple simultaneous digital health projects)
- ❖ Requires multi-sectoral coordination
- ❖ Consensus-building takes time but the results are more sustainable

Interoperability requires close coordination of various projects often led by multiple departments. Effective program management ensures various stakeholders coordinate their efforts to achieve optimal impact.

Standards, when adopted by people, enables interoperability!

PROGRAM MANAGEMENT

Program
Management
Offices

ON PEOPLE AND PROGRAM MANAGEMENT

- ❖ AeHIN calls upon stakeholders to **support the MoH strengthen the capacity and capability** of their national **Digital Health Program Management Office (PMO)**. This includes developing capacity to manage multiple digital health-related projects in partnership with other sectors
- ❖ We encourage MoH to **establish a pool of certified project managers (National Program Management Team/Office)**
- ❖ MoH may **leverage regional learning networks like AeHIN** to facilitate **PMO-to-PMO learning/sharing/support**

Encourage Cooperation -> Enable Collaboration -> Ensure Coordination -> Endeavour Convergence -> Experience Coherence

PROGRAM MANAGEMENT

Program Management Offices

ON **S** STANDARDS AND INTEROPERABILITY

- 1) We request open access and technical assistance to international health standards like **ICD11** and **HL7-FHIR**. These **health standards** are important components of **interoperable digital health systems**, enabling availability of data for better patient care and monitoring of population health.
- 2) We encourage setting up of **Interoperability Labs** in each country as Centers of Excellence. At the regional level, they will comprise the **Community of Interoperability Labs (COIL)**.

STANDARDS & INTEROPERABILITY

Interoperability
Labs

AeHIN Community of Interoperability Labs (COIL)

- **Network of interoperability laboratories** sharing knowledge and tools
- **Build capacity within countries** for interoperability
- **4Ts: teaming, tooling, training, testing**

Active Country Labs:

- Philippines (University of the Philippines Manila Standards and Interoperability Lab)
- Thailand (Standards and Interoperability Lab-Thailand)
- New Zealand (Aotearoa New Zealand Interoperability Lab)
- Taiwan (Standards and Interoperability Lab-Taiwan)
- Sri Lanka (Sri Lanka Community Interoperability Lab) - Virtual

Labs in development:

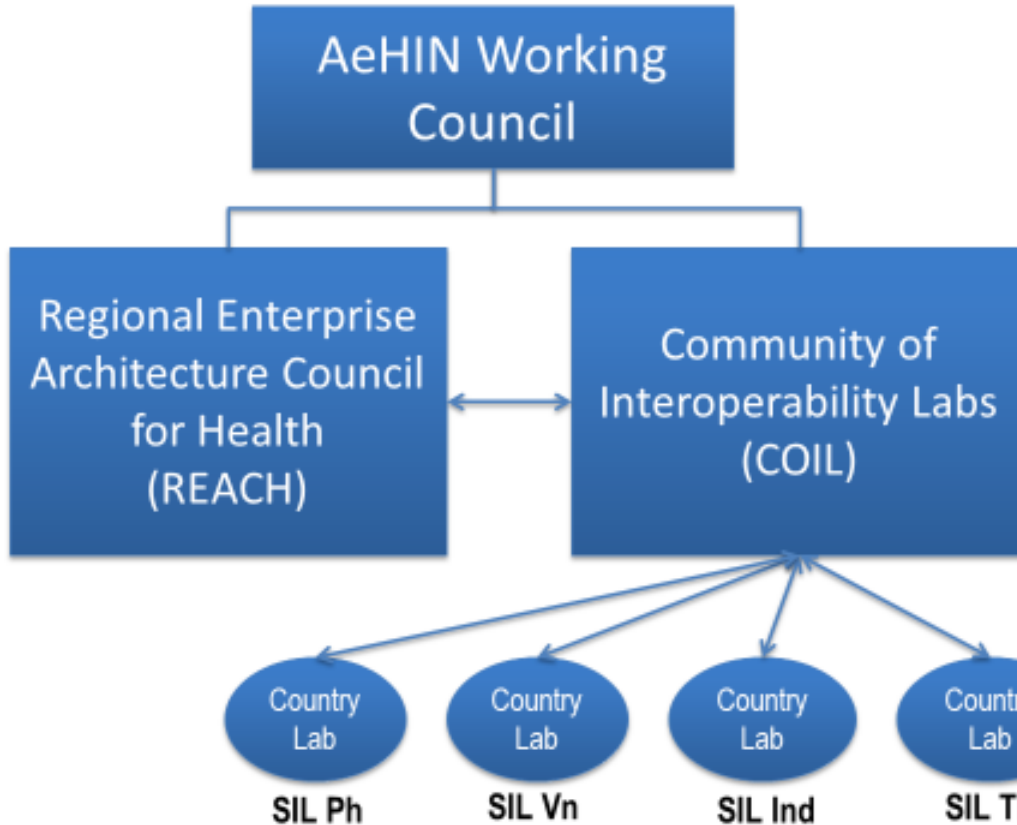

- SIL-Laos, SIL-Nepal, SIL-Hong Kong

AeHIN REACH

Regional Enterprise Architecture Council for Health

- **TOGAF trained or certified** from MOH/academe assigned to the architect role in their countries
- **TOGAF certified professionals and firms** within countries interested in providing support to the government or MOH

The REACH and COIL

COIL Call to Action

- 1) create one interoperability lab following the template
- 2) support interoperability use cases prioritized by the MOH
- 3) consult REACH

REACH Call to Action

- 1) identify an internal enterprise architect
- 2) get external support from professional architect
- 3) nominate #1 and #2 to REACH
- 4) check the output of COIL

University of the **Philippines** Manila Standards and Interoperability Lab (SILab)

The image shows a social media profile for UPM SILab. At the top, there is a header with the lab's logo (a stylized flame in green, yellow, and red) and the text "UPM Manila Standards & Interoperability Lab". Below this, contact information is provided: "UPM SILab" with an email icon and "silab.upm@up.edu.ph", and a Twitter icon with "upm_silab". A circular profile picture of the logo is on the left. Below the header, there are icons for a menu, email, and notifications. The main bio section reads: "UPM SILab" followed by "@upm_silab" and "Follows you". The bio text is: "Improving the digital healthcare in the Philippines by facilitating secure standardized healthcare data flow within the country" followed by the hashtags "#UPMSILab" and "#DigitalHealthWeek2022". At the bottom, it says "College & University" with an information icon, "UP Manila" with a location pin icon, and "Joined September 2022" with a calendar icon.

Aoteroa New Zealand Interoperability Lab (ANZIL) Launches - First Event May 16-20

Sunday, 1 May 2022

Share | | | |

SECTOR UPDATE - ANZIL

S23M Healthcare Solutions has launched the not-for-profit Aoteroa NZ Interoperability Lab (ANZIL) and had an establishment meeting with the founding members in March. ANZIL is the Aoteroa New Zealand partner to the Asia eHealth Information Network (AeHIN) Community of Interoperability Labs (COIL), around Asia and the Middle East. The COIL Labs seek to facilitate health information systems interoperability, based on standards, with a heavy focus on FHIR®, and the International Patient Summary (IPS), as well as SNOMED® CT, especially the free SNOMED subset available to low income countries that supports codes for use in IPS Resources. However, ANZIL is a member-driven organisation, and open to exploring any de-facto or de-jure standards-based interoperability that our members are using.

The ANZIL Lab membership structure allows maximum engagement, starting with just \$50 per annum for curious individuals, and then a tiered membership fee for organisations of different sizes.

[Membership information and applications are here.](#)

Members, and new participants that join us before 16 May can attend the first Annual Creative Collaboration event for free. The overarching theme of the event is "What do the ANZIL members wish to achieve during the first year".

It is held in an online variation of the Open Space format workshop structure running between 16 May and 20 May 2022. The workshop includes a 2-hour interactive kick-off, as well as a week of asynchronous online collaboration on the topics submitted by our members. The workshop will conclude with a 30-minute presentation of results and a 30-minute closing roundtable to coordinate agreed follow-up activities. The total amount of engagement is intended to be equivalent to a one day workshop, spread over the week. The topics to be discussed, and where you choose to learn or contribute knowledge is completely members' choice.

Introducing the Aoteroa New Zealand Interoperability Lab (ANZIL) to the COIL Network

25 January 2022, 6 PM Manila time

Speakers:

Jorn Bettin, Partner at S23M

Keith Duddy, Senior Advisor at S23M

Outline:

- Introduction to the Aoteroa New Zealand Interoperability Lab (ANZIL)
- Explain the launch process, including goals, participants, and activities
- Provide a short overview of its first interoperability project, including OpenMRS and the S23M Care Platform using the IPS to exchange patient information
- Open Forum (labs sharing on interoperability priorities, and suggestions on collaborations with ANZIL)

Sri Lanka Community Interoperability Lab (Virtual)

The screenshot displays the website for the Sri Lanka Community Interoperability Lab (SL-COIL). The header features the HISSL logo, contact information (+94 11 268 9545, info@hissl.lk), and social media icons. The navigation menu includes Home, About HISSL, ERC, Initiatives, Conferences, and Contact Us. The main content area is titled "SL Community Interoperability Lab" and lists the manager (Prof. Vajira Dissanayake) and team members (Dr. Roshan Hewapathirana, Dr. Clive C. James, Dr. Arjuna Wijekoon, and Dr. Pamod Amarakoon). A paragraph describes the lab as a component of AeHIN Interoperability Labs, aiming to serve as reference centers and maintain strong links to ensure regional interoperability. A "Latest News" section on the right lists recent events: Digital Health Sri Lanka - 2019, Launch of the Digital Health Week 2018, DNMS Wins the mBillionth Award, and MoU between HISSL and Kathmandu University. Below the news is a "Subscribe for Updates" form with fields for Name and Email, and a Submit button. The footer contains copyright information (© 2018 - All Rights Reserved - Health Informatics Society of Sri Lanka) and social media icons.

Sri Lankan Community Interoperability Lab is a component of AeHIN Interoperability Labs. The AeHIN Community of Interoperability Labs is a collaboration of institutions from Asian countries interested in collaborating around the challenge of health information interoperability. They aim to serve as reference centers in their respective countries but also maintain strong links to each other to ensure regional Interoperability. Each country COIL member offers its own capacity building program and shares it with the rest of the network.

OpenHIE Certification

In this program, AeHIN supported individuals with the cost of taking the OpenHIE Certification Exam (39 USD). All the courses and materials to prepare for the certification exam are free through OpenHIE Academy.

The certification exam designates that the certificate holder “understands the basic concepts of interoperability, understands the basic function of health information exchange and the OpenHIE Architecture components, can designate which HIE architecture components are needed to solve a health data exchange challenge, and has a basic understanding of the importance of semantic and syntactic standards.”

List of Passers

(Who consented to publish their name)

- ENNY RACHMANI, INDONESIA
- SOUTHINY PHIAHOUPHANH, LAO PDR
- CHIAW LEE CHIEW, MALAYSIA
- FATHIMATH SHAMAH, MALDIVES
- WAI PHYO THANT, MYANMAR

- PRABATH JAYATISSA, SRI LANKA
- POORNA FERNANDO, SRI LANKA
- PRABBHADINI GODAGE, SRI LANKA
- PUBUDU ARIYARATHNE, SRI LANKA
- SHAKIRA IRFAAN, SRI LANKA
- SONALI LUNUWILA, SRI LANKA
- WAI PHYO THANT, MYANMAR

Summary of Feedback

Positive:

- Learn how to identify the components of HIE in different use cases and also understand how we can make use of this openHIE framework and apply it to the local context

Needs Improvement:

- The course should contain more practical examples

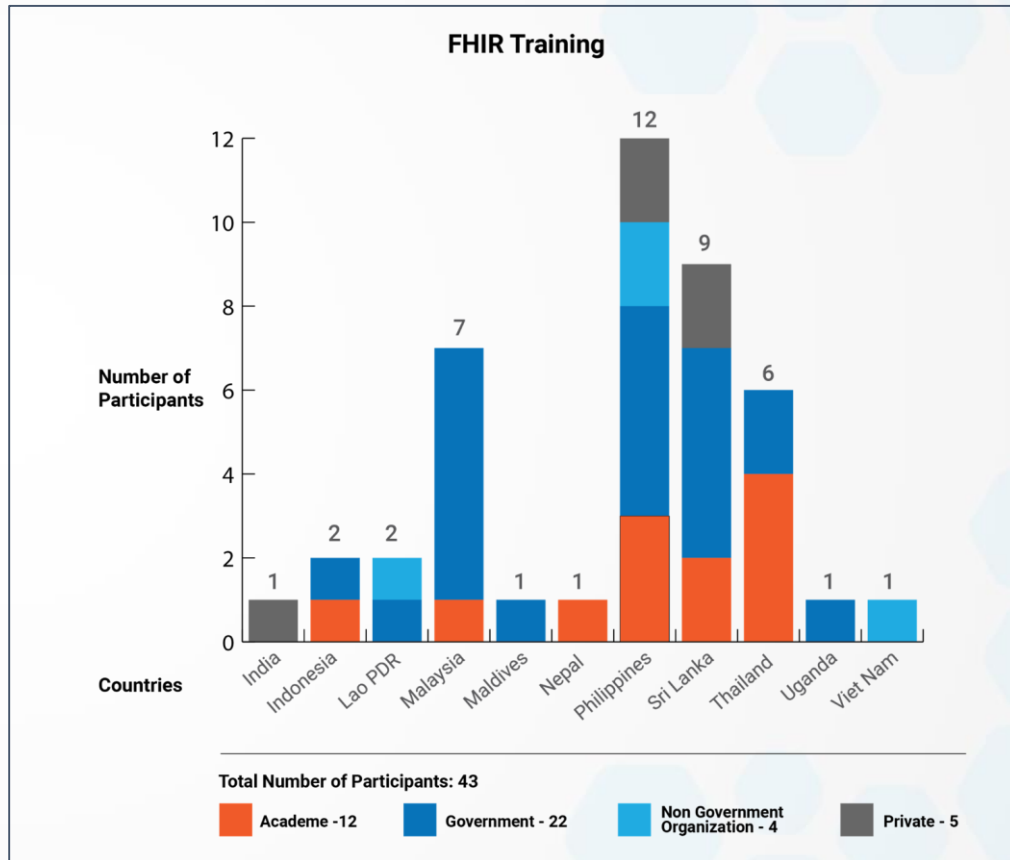

Recommendations and Other Comments:

- Similar program for the enterprise architecture
- Similar program for the more advanced course

FHIR Training

The Asia eHealth Information Network (AeHIN), with the support of the Patrick J. McGovern Foundation, has organized a three day live training on FHIR R4 Proficiency Training/Exam Preparation for 40 participants from August 5 to 7, 2022.

The training was conducted by Health Level Seven (HL7) International for two hours each day, from 10 AM IST to 12 PM IST, with a total duration of six hours. The training outlined the FHIR principles, FHIR resource concepts, FHIR Rest API & Query, FHIR profiling & conformance, and also guidance on the format and coverage of the FHIR R(4) Proficiency Certification Exam.

List of Passers

(Who consented to publish their name)

- NGO TUAN, VIETNAM

Summary of Feedback

Positive:

- Live learning with professional trainer from HL7, so the participant can interact with the trainer and the other participants from different country
- A comprehensive overview for the preparation of HL7 FHIR R(4) Proficiency Certificate exam

Needs Improvement:

- The course is very condensed, only 6 hours training which is too short

Recommendations and Other Comments:

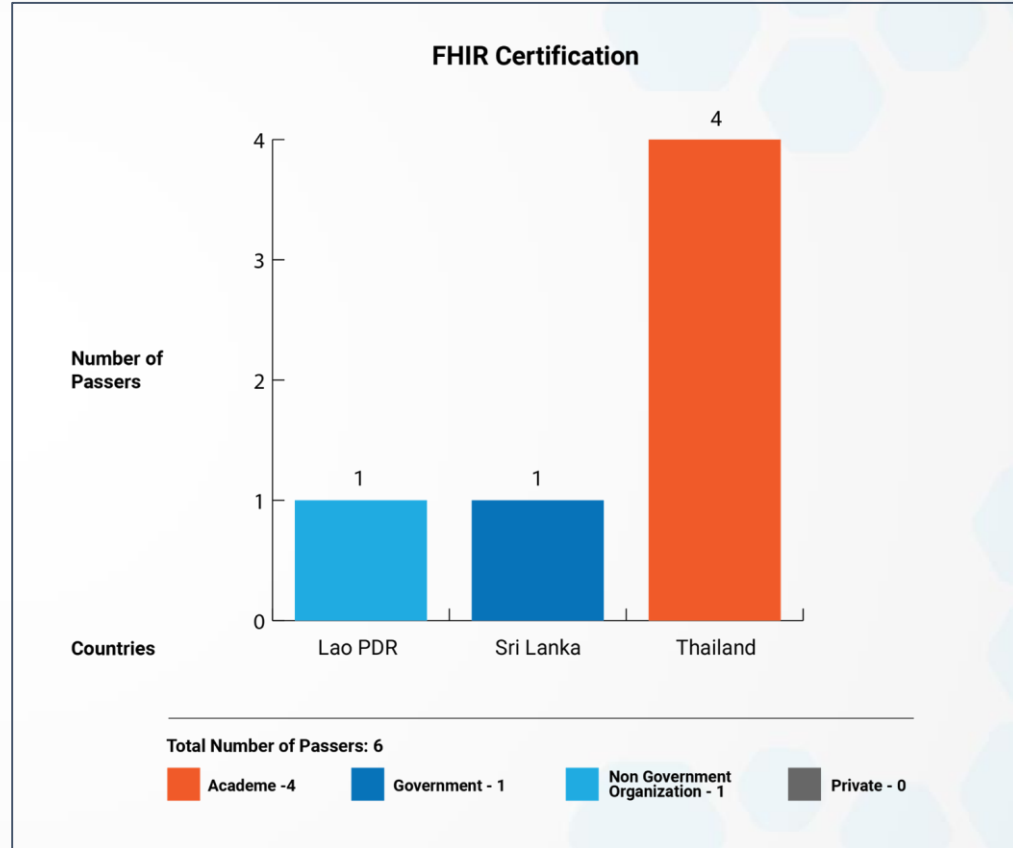

- Extending the training period
- More focus on the real world implementation

FHIR Certification

In this program, AeHIN supported the cost of HL7 FHIR (R4) Proficiency Certification (315 USD) via reimbursement process for those who participated in the **AeHIN FHIR (R4) Proficiency Training Program** on August 5-7, 2022. This serves to encourage the participants that they should **take part in increasing the capacity of healthcare interoperability within their country**, and thus, contribute in promoting interoperability in the region.

In line of developing a regional FHIR implementation guide, certificate passers created a draft one-pager action plan for a FHIR use case (interoperability project) in their respective countries:

- Standard and Interoperability Lab – Laos (SIL-LAO)
- Interoperability Project in Sri Lanka
- Current Usage of Clinical Terms in Real Practice in Thailand and Development of an Interface Terminology conformed to International Standards such as HL7 FHIR and SNOMED CT
- Developing a HL7 FHIR-based Interoperable Allergy Information Model in Thailand
- Health Informatics Exchange Zone for Suranaree University Hospital (SUTH)
- MyVax Personal Immunization Record

List of Passers (Who consented to publish their name)

- Natdanai Thaipipat, Thailand
- Thanaphop Na Nakhonphanom, Thailand
- Teerapat Saengthongpitak, Thailand
- Nat Tangchitnob, Thailand
- Shakira Irfan, Sri Lanka
- Kevin Bilavarn, Lao PDR

Summary of Feedback

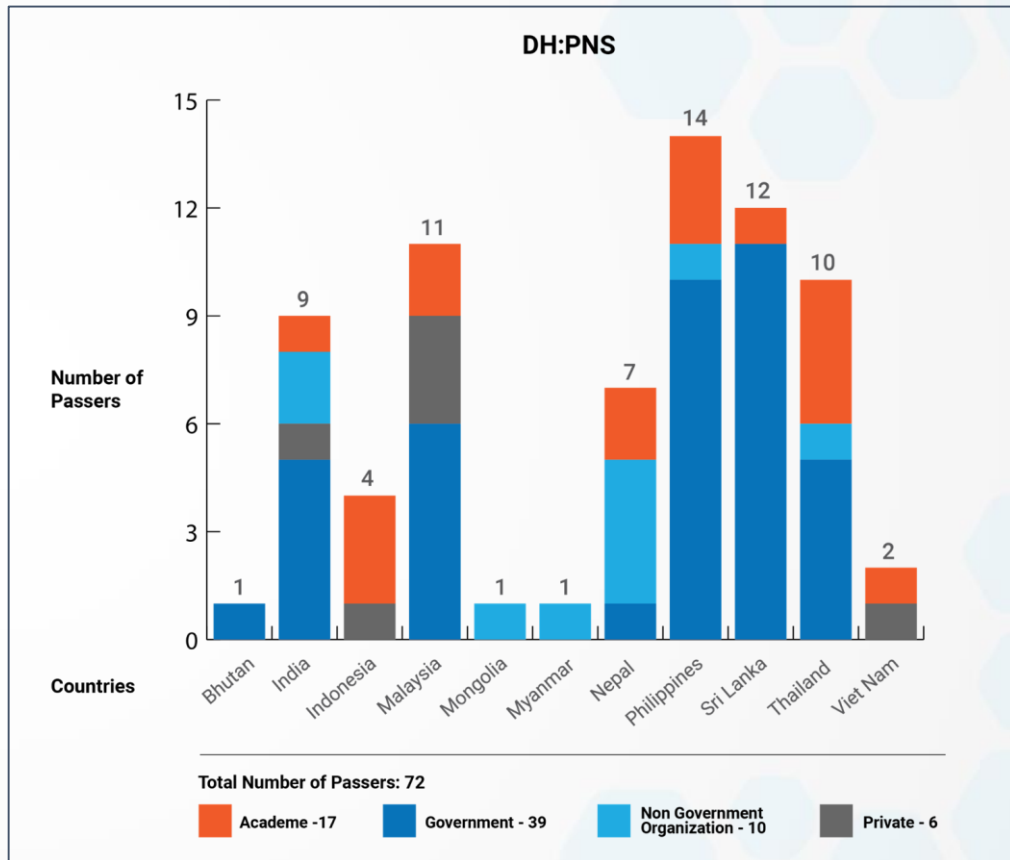

Positive: <ul style="list-style-type: none">- Learn more about the fundamentals in HL7 FHIR, can apply this knowledge for teaching program and real world implementation	Needs Improvement: <ul style="list-style-type: none">- None
Recommendations and Other Comments: <ul style="list-style-type: none">- It would be interesting to have use cases of FHIR profiling process, country strategies and approaches about FHIR, integration of FHIR interface in legacy EMR systems, which would help understanding the bigger picture and how important FHIR is.	
Testimonials: <ul style="list-style-type: none">● "Awesome program to stimulate FHIR implementation" – TEERAPAT SAENGTHONGPITAG, THAILAND● "Honored to be part of the FHIR community, thanks to AeHIN" - KEVIN BILAVARN, LAO PDR● "The 3-day Exam preparation course and the Presentations were excellent guides. The support from AeHIN throughout the programme was simply great!" - DR SHAKIRA IRFAAN, SRI LANKA● "Great supports from the staffs. Great program for studying and earning FHIR certificate. I'm very thankful" - NAT TANGCHITNOB, THAILAND● "Thanks for the great support from AeHIN! The successful completion of the HL7 FHIR R4 Proficiency Exam enables me to contribute to health information exchange in Thailand" - THANAPHOP NA NAKHONPHANOM, THAILAND● "It was a really informative and useful program; I clearly understand about the FHIR resource concepts and how to exchange them." - NATDANAI THAIPIPAT, THAILAND	

DHPNS Course

A blended version (live sessions for activities and offline self-paced reading) for **Digital Health: Planning National Systems** was conducted from 19th Sept 2022 - 8th Dec 2022. Live sessions on every Wednesday and Thursdays.

The course was conducted by TechChange and curriculum was developed by USAID, Digital Square, TechChange, and Last Mile Health based on content compiled by the World Health Organization (WHO) and the International Telecommunications Union (ITU). It features critical technical concepts, existing best practices, and pragmatic methods, all framed according to the national planning cycle that Ministry of Health officials manage.

A total of 97 participants joined the AeHIN cohort from 13 countries and at the end, we have 72 passers (11 countries). A community of practice was launched on 24th January 2023.

Final Project Titles

Country group	Final Project Title
India/Myanmar (Group A)	Healthcare Workers at Community Level: Digital Intervention Programme for NCD
Thailand (Group A)	Enabling Health Information Exchange: Costing Digital Health Interventions
Malaysia (Group A)	Improving Referral System in Public Healthcare Facilities: Digital Health Intervention
Nepal/Indonesia (Group A)	Digital Health Intervention
Philippines/ Bhutan (Group A)	Interoperability and Improving the Nation's Health Statistical System
Sri Lanka (Group A)	Digital Health Intervention Implementation
Malaysia (Group B)	Making Digital Health Apps Interoperable
Philippines (Group B)	Improving Patient Visits in Philippine Clinics: Digital Health Intervention Implementation
Sri Lanka/Viet Nam (Group B)	Improving Supply Chain Management: Digital Health Intervention (OpenLMIS) Implementation
India (Group B)	Ayushman Bharat Digital Mission (ABDM)
Nepal (Group B)	Digital Health Intervention Implementation
Thailand (Group B)	The New EMR for a Community Hospital

Summary of Feedback

Positive:

- Well structured course and great facilitation
- Interactive course
- Good programs and should be promoted for government officials

Needs Improvement:

- More practical examples
- Include more topics
- Opportunity for in-person meeting to have more connection
- Challenges in group discussion, especially with different time zones

Recommendations and Other Comments:

- Useful course for people who are interested with digital health

Testimonials:

- At first I was very hesitant since I was a non-medical staff. I am a Programmer for the Department of Health. But the course was very intuitive and I was able to learn a lot. I learned a lot more than what I expected.
~Julius Castro
- This course was very eye opening. It breaks down the concept of digital health into sizeable pieces to better shed light on the roots of the problem. Namely, interoperability. We are then taught to build back a more interoperable, and sustainable health system model using the various concepts. All in all, I have gained a new perspective on understanding a health system. ~Jonas John

OpenHIE Academy's Foundations in Health Information Exchange Certification Exam

(AeHIN cohort 2023)

All of the courses and materials to prepare for the certification exam are **completely free** through OpenHIE Academy.

AeHIN will support individuals with the cost of taking this OpenHIE certification exam (39 USD). Please read the FAQs before taking the certification exam.

WHO ARE ELIGIBLE?

- Must be an AeHIN Member (Not a member? Join [here](#).)
- Members and volunteers of the AeHIN Community of Interoperability Labs will be given priority

MECHANICS

1. Eligible applicants must fill in their application form through this [link](#) on or before **April 17, 2023 (5:00 PM MANILA TIME)**.
2. Applications will be reviewed by the AeHIN Governing Committee and AeHIN Working Council.
3. Applicants will be notified of their status via email with the steps for registration.
4. For the selected applicants, the links and instructions regarding the login process will be sent via email. Participants should complete the course **WITHIN FOUR WEEKS UPON RECEIPT OF THEIR ACCEPTANCE EMAIL**. Successful participants should send their certificate of completion for the course to secretariat.malaysia@aehein.net.

For questions, please email secretariat.malaysia@aehein.net.

AeHIN Convergence Workshops

An MOH-led event to gather support from public and private sector stakeholders behind the National eHealth Strategy

- Other ministries (finance, social security, ICT, economic, etc)
- Development partners (WHO, ADB, UNICEF, GIZ)
- Non-government organizations (professional societies, organized industry groups, etc)
- Private sector (companies offering goods and services) (optional)

How AeHIN can help:

- Design the programme
- Share templates
- Invite resource persons
- Facilitate sessions in actual workshop

Convergence Workshop Outputs

(from previous workshops)

- Agree on an MOH-led multi-sectoral **governance structure**
- Agree on a **digital health blueprint** and transition roadmap
- Agree on regular coordination of eHealth-related **program management** activities
- Agree on **standards**

AeHIN Convergence Workshops

- 2015 August 19-20, Myanmar
- 2016 June 21-23 in Paro, Bhutan
- 2016 November, Indonesia
- 2017 February 15-17, Hanoi, Vietnam
- 2017 April, Dili, Timor Leste
- 2017 July 24-27, Kathmandu, Nepal
- 2019 October 28-29 in Thimphu, Bhutan
- 2021 March 30-31, Lao PDR (Virtual)
- 2022 December 22-23, Colombo, Sri Lanka
- 2023 January 24, Jakarta, Indonesia
- 2023 January 30, Vientiane Capital, Lao PDR

AeHIN General Meetings (2012-2022)

- **2012 Asia eHealth Information Network Launch Workshop** (7-10 August 2012 at United Nations Conference Center, Bangkok, Thailand)
- **2nd AeHIN General Meeting** (23-24 September 2013 at Pan Pacific Manila Hotel, Philippines)
- **Conference on Measuring and Achieving Universal Health Coverage using ICTs in Asia and the Pacific and 3rd AeHIN General Meeting – From Strategy to Implementation** (2-5 December 2014 at Asian Development Bank, Manila, Philippines)
- **Conference of Measurement and Accountability for Universal Health Coverage in the Asia Pacific and AeHIN 4th General Meeting** (26-30 October 2015 at Padma Resort Legian, Bali, Indonesia)
- **Digital Health Conference in the Asia-Pacific and 5th AeHIN General Meeting** (6-10 March 2017 at Horizon Lakeview Hotel, Nay Pyi Taw, Myanmar)
- **6th AeHIN General Meeting and Conference on Interoperable Digital Health for Universal Health Coverage** (7-9 October 2018 at Cinnamon Grand Hotel, Colombo, Sri Lanka)
- **Strengthening Regional Health Systems Response to COVID-19: Digital Health Experiences in Asia** (7, 14, 21, 28 January 2021 via Zoom/GM website)
- **AeHIN General Meeting and Conference 2022 Accelerating Digital Health Towards Universal Health Coverage** (10-12 October 2022 at Ascott Makati, Manila, Philippines)

AeHIN Hour

- Regional webinars held at present: 288
- 8,437 attendees (cumulative, not unique)
- Includes webinars and roundtable discussions with Ministry of Health in countries, and organizations such as International Planned Parenthood Federation (IPPF), Transform Health Association, Novartis Foundation, and WHO.
